

- To install the laravel

1. install composer

2. open terminal to install laravel installer using: `composer global require laravel/installer`

3. To create a new laravel project, `laravel new project_name`

then select option `none, 0, no`

4. to run the laravel project, `php artisan serve`

5. to create a new controller, `php artisan make:controller ControllerName`

6. to create a new model, `php artisan make:model ModelName`

- Routing:
- For get request:

```
Route::get("URL",function() {return functionName;});
```

```
Route::get("URL",[controller::class, 'functionName']);
```

```
Route::get("URL",[model::class, 'functionName']);
```

- For post request:

```
Route::post("URL",function() {return functionName;});
```

```
Route::post("URL",[controller::class, 'functionName']);
```

```
Route::post("URL",[model::class, 'functionName']);
```

- For views:

```
Route::view("URL",'viewName');
```
